Definition of Insurance

Insurance is to protect somebody
against the economic loss caused by the
termination of a producing power. One of
two causes must come to every life, destroy-
ing its producing power, premature death
or the debility of old age.

What's In A Shoe---

Labor, and more labor, expensive and high-
ly skilled—
Leather, and linings and a multitude of lit-
tle things that make perfection—
Style, and fit and comfort that distinguish
American Shoe makers—
World conditions have forced these things
above the old level of cost but efficiency and
competition have kept prices from advanc-
ing to the same degree as many other staple
lines of wearing apparel—

All that's in a shoe today is there because
you want it—at a cost in comparison with
its service to you.

Georgiana Chadbourne did not re-
duce the high cost of living. Neither
did she take the war tax off amuse-
ments. She was out for a wild time
when she went "In Search of a Sin-
ner," the latest Constance Talmadge
production. When the angels took
away Georgiana's model husband,
she went into mourning for the exact
period required by social status—
and then? The lid was off! All over
Central Park Georgiana roamed
looking for an apostle of sin, and the
best she could find was a member of
"The Purity League." But circum-
stances, after cases, and Georgiana
made the gentleman fit requirements.
"In Search of a Sinner" is a John

Amendment Invades State Constitution

private, as I understand it, to ratify
the proposed amendment.

"If the people of Vermont, in ac-
cepting a place in the union of states,
indirectly lost in whole or in part
the right of self-government and
conferred it on a legislature, there
is all the more reason why a legisla-
ture should not pass upon a question
which has arisen since their election
and upon which their constituents
have had no opportunity to express
themselves.

"We must now either remodel our
own constitution to conform with the
mandate of the supreme court of the
United States, or the constitution of
the United States must be amended
to provide for a referendum of the
free men of the several states before
amendments to that constitution be-
come effective. As it stands and is in-
terpreted by the supreme court to-
day, the federal constitution threat-

and the foundation of free popular
government.

"The seventh amendment, provid-
ing for federal income tax, was lob-
bied through Congress and the state
legislatures by federal agents. The
16th amendment, for federal prohibi-
tion, was forced through Congress
and the state legislature by a power-
ful and irresponsible organization, op-
erating through paid agents with un-
limited funds. It is now proposed to
force through the 19th amendment,
for woman suffrage, in the same
manner and also without the sanction
of the freemen.

"I have been asked to overlook
these considerations as a matter of
party that invades a well-established
principle, not expediency, and the
party that invades a well-established
principle of popular government will
suffer in the end."
